

Kamil Alami

Product Manager – AI Builder

✉ alamikamil@gmail.com 📞 +33 6 19 06 12 15 📍 20 cour des petites écuries, 75010 Paris

Profile

Product Manager, 6 years across B2B SaaS — from sports fan engagement to fintech to beauty & wellness. I've repeatedly taken products from idea to production: defining vision, designing UX, and when needed, building the thing myself (React Native, Next.js, Supabase). Comfortable in regulated environments, AI product integration, and the unglamorous work of scaling operations. Background in finance, mindset of a builder.

Employment

Co-Founder & CEO Jul 2025 – Present

Ello — Beauty & Wellness SaaS, Casablanca

Booking and management platform for beauty & wellness salons in Morocco. B2B SaaS with a client-facing booking app (ello.ma) and a pro dashboard for salon owners (ello-pro.com).

- Built the entire platform solo from zero: mobile app (React Native), dashboard (Next.js), API, database (Supabase). No team, no shortcuts.
- Scaled to 100+ salons and thousands of bookings processed across Morocco. Started by selling door-to-door, then recruited and managed a field team of freelancers to keep growing.
- Handled client support and salon relationships directly. Short feedback loop between the field and the product.
- Owned the full go-to-market: pricing, activation, onboarding, churn reduction.
- Designed the booking engine at the core of the product: parallel services, staff availability, group bookings, time-slot optimization.
- Shipped an AI-powered WhatsApp bot for salons (intent routing, session management, rate limiting) and an in-app chatbot with conversation history.
- Added operational observability from scratch. 50+ event types logged, behavioral analytics dashboard, admin audit trail.

Head of product Dec 2024 – Jun 2025

Heavenize, Paris

Enterprise SaaS platform for asset management and financial advisory technology.

- Joined as first product hire. Set up the full agile environment from scratch (ClickUp, processes, rituals) where none existed.
- Defined product and marketing strategy: personas, pain points, market opportunities, roadmap balancing quick wins with long-term bets.
- Designed and shipped a multi-agent AI chatbot with automated document ingestion, RAG pipeline and reranking system to surface accurate answers from internal financial data.
- Built data exploration flows for complex proprietary datasets. Integrated KYC and compliance constraints into the UX without making it painful.
- Put in place a behavioral analytics system to track usage patterns and feed continuous product improvements.

Head of product May 2020 – Jan 2023

Fanprime, Paris

B2B SaaS for fan loyalty and engagement, used by major sports and entertainment organizations.

- Owned product strategy for a B2B SaaS used by major sports organizations: vision, roadmap, KPIs, executive reporting.
- Built a points/tiers/challenges engine. +35% daily active users on targeted cohorts.
- Integrated tokenized loyalty mechanics (NFT-backed rewards) to open new

Hobbies

- Tech startups
- Entrepreneurship

monetization streams and boost fan engagement.

- Managed cross-functional squads (engineering, design, marketing) through full agile cycles. Improved sprint predictability and release cadence.

Early career in Finance

2015 - 2020

Sold structured products to institutional clients at ProFin Partners (London) and Zenith Capital (Paris). Brief stint in private banking at BNP Paribas. Built a deep understanding of complex financial products, client needs analysis and B2B sales cycles.

Side projects

■ kasba.app - Management platform for short-term rental concierges. Properties, bookings (Airbnb, Booking, direct), finances, task management and owner portal in one dashboard.

■ chinauto.ma - First comparison platform for Chinese cars in Morocco. Prices, specs, brand guides and financing simulator across 24+ brands (BYD, MG, Chery, Geely...).

Education

MSc International Wealth Management (Finance)

ESCP EUROPE, Paris

Sep 2017 - Sep 2018

Bachelor's, Business

NEOMA Business School, Rouen

Sep 2010 - Sep 2014
